STEM Park Visit

Friday. They have separated us into groups. There, we found many games related to mathematics, science, and physical fitness. It is useful for educational purposes. related to math, we have done many practicals. We felt it was easy to learn the concepts of many theories from it, like Pythagoras' theory, Bernoulli's theorem, etc. It includes the topic of algebra, etc., not only mathematics. Apart from that, we have done many practicals related to physics, chemistry, biology, etc.; they have designed huge models of DNA, pinhole cameras, concave and convex lenses, etc. From there, we learned about its uses and functions. We found many games that helped us maintain our health. We found a huge model of a periodic table there and found powerlifting. There we found different types of soil and stones. There was a mini 3D theatre. There, we tested the demo car. We saw the seven xylophones, from which we learned about the frequencies. In the park, we have also seen the models from which we have gained someknowledge about the law of conservation. The

explained to us about the experiments and practicals. It has a clean environment. The park was so clean. There, I saw a model of Chandrayan. When I saw that, I felt so proud. We gained so much knowledge about solar cookers, solar panels, etc., and we also found different types of bridges. We also gained so

staff of the stem park

knowledge about optical illusion. There, we saw a large Tanjore doll. We gained some knowledge about cyclones and wind direction (which shows the direction of the wind). Finally, we explored all these things peacefully and enthusiastically. After enjoying all those pleasant games, we returned safely to our school on the Kamak bus. Inter-house Badminton Match October 14, 2023 | Tr. Alagu Aparna On the third of November, a badminton match was held at Kamak School. It was an inter-house tournament. The tournament was conducted

between the four houses. The four houses are

Chera, Chola, Pandiya, and Pallava. All the

enthusiastically. A total of eight Kamakians participated in the tournament. For each house,

participants took part in the tournament

there were two participants. The first serve will be chosen by the toss. Then the teams will be chosen by lot numbers. Chera, K. Senthil of Grade IX, and Yuva Nandhana of Grade IX have participated. From Chola, K. Yeswanth of Grade VIII, and Sonu Priya of Grade VIII have participated. From Pandiya, D. Martin Jerson of Grade VII and R. Harini of Grade VII have participated. From Pallava, P. Kiruthika of Grade VI and P. Diva of Grade IX have participated. According to the first round, Chera and Pallava played the match. Pallava House won the first round and was selected for the next round. Pallava scored ten points in the first round. According to the second round, Chola and Pandiya played the match. In that, Pandiya won the match. And so Pandiya gained ten points in the corresponding round. As per the first and second rounds, Pandiya and Pallava successfully advanced to the final round. It was the most interesting match I have ever seen!!! After the hard work of the participants, Pandiya won the match! Pandiyas were the winners! And Pallavas were the runners-up of the tournament! After seeing the match, a new kind of inspiration came into my mind. That thought inspires me to work hard like the players and reach the goal! Project Presentation - JS November 25, 2023 | Tr. Roshini

conducted for children of Grade 1 to 5 in our Junior school campus. The children presented their projects on the topics given on the basis of each subject. The students bought their creative, unique

and colourful project that were designed and presented well. The projects were exhibited for the parents and the students explained their projects

We had school project presentation day on campus on November 3rd, 2023. All the students from grades I to XII were instructed to bring their projects. I was very eager to come to school that day. We invited judges from various institutions. I was excited to meet the people who would judge us. I was very happy to present my project in front of audience and the judges. We had the project presentation on Friday and the exhibition on Saturday. All the students submitted their projects on time. They allotted specific lot numbers for each student. I got my lucky number 7. I was a bit nervous while explaining my project, but My Teachers made me strong. I had a wonderful experience. Judges appreciated me. They made my

day. I came back to my class from the presentation

hall with lots of cheers! **Vaibhav Competition**

student at our Kamak school, participated and placed second in the capture and caption competition. Keziya, also in grade 12, and Ms.Parameshwari in grade 11 both placed third on the quiz. Sixth out of seventeen schools was our kayak school. The quiz competition was conducted by Dr. Raju. He gave an excellent explanation of the quizzes and what quizzing is. They gave me a good refreshment. We had a superb meal there, which was both hygienic and tasty too. We had a

good experience in the competition we participated in. The final round of the quiz was an awesome

moment where an audience like us was answering.

We did a great job there. After the vote of thanks

was given by the school captain, the program ended with the national anthem, where everybody

was singing with patriotism.

State-level Throwball Tournament November 08, 2023 | Dilip

On Monday, we traveled to Chennai. The game began on Tuesday at 9:00 a.m. local time. We defeated Madurai in our opening game, and we also triumphed over Chennai in our second league. In our third encounter with Vellore, we emerged victorious again. Following these three wins, we were able to advance to the quarterfinals. We had to play

against Krishnagiri. We easily won that game and advanced to the semifinals. We played Tirupur in the semifinals, but regrettably, we were defeated. We faced Karur in the second semifinal, and we prevailed. We took third place overall in the government's state-level throwball championship for 2023-2024, we took third place overall. We take great pride in breaking the record this year and winning the throwball trophy as the only district in Tuticorin.

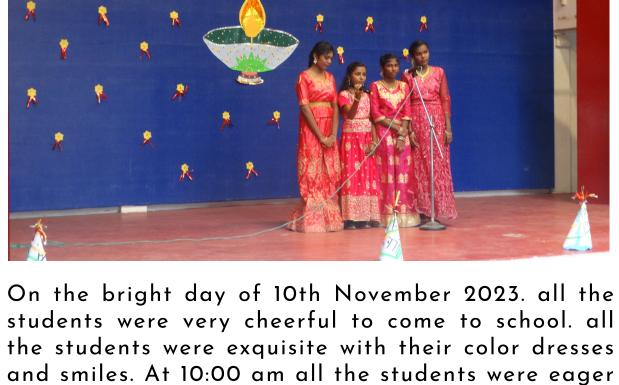

credit for the victory. The substitutes, Jebin and Aadesh, were crucial to this victory as well. Only in the presence of our coach Mr. Esakki Durai, did we achieve this greatest victory. He is the only man who gave up his entire Sunday to help throwball students practice. We can't believe we wouldn't even be able to win this battle without him. Mr. Selvam, our special throwball coach, was our pillar of support throughout the game. I'm grateful to our Kamak management for providing special amenities like a ground, a net, and eco-friendly surroundings in addition to this amazing opportunity. Diwali Celebrations - JS November 10, 2023 | Tr. Lithiya

by welcome dance. A dance of cute little Krishnas and Radhas was presented as a visual treat by our children of Grade 2 and 3. A Tamil skit was enacted by our children to remind the reason of celebrating Diwali. Another graceful dance performance was delivered by our Grade 4 and 5 children. Safety measures was presented by our children on how to celebrate Diwali safe and sound. The programs were well organised by our teachers and the celebration ended with the vote of thanks and National anthem Diwali Celebrations - HS November 10, 2023 | Pavithra - Grade

abilities magnificently.

the students of classes IX to XII. Mr. Tenzing Paulrajan was the resource person for the day. He took the session interestingly. He discussed about how to choose a career He advised us to choose our career

based on our interests. He encouraged the students by giving them chocolates whenever they answered his questions. He advised us to do a self-analysis. He also explained the different courses students enlightened about their end of courses were available. Information of allthe highly motivating and various opportunities after school completion was given. At the were he cleared the doubts raised by students. It was an informative day for the students and faculty very informative as well as the members who attended the session.

On behalf of Kamak School, we

STEM Lab Inaugration

November 24, 2023 | Jebin

have inaugurated a new stem lab. The ceremony was filled excitement with anticipation as Mrs. Geetha Jeevan, the esteemed Minister of Social Welfare and Women Empowerment, graced us with her presence as the chief guest. The Kamak Student Council and band warmly welcomed her, setting the tone for a truly unforgettable event. The ribbon-cutting ceremony

was made even more unique with the presence of a robot bringing the scissors, adding a touch of modernity to the event. Following that, our talented choir students mesmerized everyone with their beautiful renditions of the prayer song and school song, further enhancing the ambiance. Mrs. Sheeba Grace delivered a welcome speech on behalf of Kamakians. Following which, a representative from Propeller Tech, Mr. Ashik, explained in detail about STEM's inevitability and its growth. After that, Mrs. Geetha Jeevan Mam gave a speech. Then our school administration delivered a vote of thanks. Then choir students sang the national anthem, and the program came to an end.

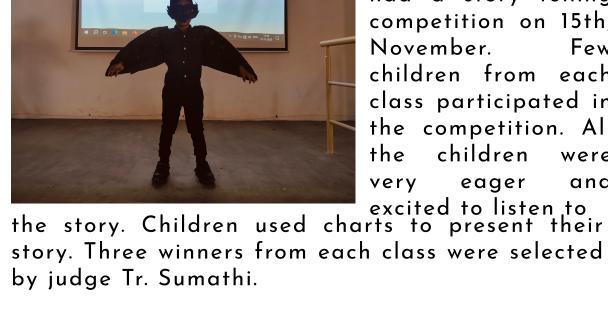

Day at Junior school campus. The KG children were taught Thanksgiving Rhymes. The children were made to sing the Rhymes. Grade 1 to 5 children wrote message thanking their teachers, parents, friends and families in sticky notes and stuck in a heart outline prepared. Thanksgiving Day - HS

share their thanks. All the students from grades 6 to 12 shared their thoughts of gratitude. The students expressed their gratitude for their teachers, friends, and family members who have always been there for them. It was heartwarming to see the genuine appreciation and love shared by everyone in the school community. The Thanksgiving celebration reminded us of the importance of expressing gratitude and being thankful for the blessings in our lives. Thanksgiving tradition is one of the most beautiful ones. spacious school auditorium. The program starts

with a melodic prayer song by the choir students in

grade 5. After the sweet prayer song by the choir,

the welcome speech was given by Tr. Selvalakshmi. It was a wonderful and energizing speech about Thirukarithigai. After the speech, the choir student sang a song for Thirukarthigai Cobbration about the importance of Thirukarthigai. Our special guests, Principal Mam, Vice Principal Mam, and P.ET. Sir, lit the lamp first, and then the teachers and students lit the lamp, and they were given delicious sweets. KAMAK MATRIC.HR. SEC. SCHOOL Then the energising inter-house dance competition was held. The judges of the competition were our celebration and the day was filled with merry and principal, Tr. Radha Rajeswari, and our vice principal, Tr. Megala Rajan, all those students participated very enthusiastically. The theme of the

dance competition was patriotism. The house

students gave a great performance. Then the

results of the dance competition were announced. The Chera House was the winner of the

competition. Then the certificates were awarded to the students, and they were given round-off

applause. The program was wrapped up with a vote

of thanks by teacher Tr. Thangamathi. After the vote of thanks, all the students got up for the

national anthem. The choir students sang the National Anthem. Then all the students departed from the auditorium. Annammal College Event November 14, 2023 | Pranav Girissh - Grade 6 I was so happy and excited and felt so proud while going in the van. When we reached the venue, Annamal College, it was raining a bit there. After entering the competition hall, I took a lot number and the competition started. When my turn came, I went to the stage and started my elocution but I stopped a bit in the middle. I completed the elocution but I had no trust in me. But after all the competitions were over, I realized our participation was more important than getting the prize.

They say change is the only thing about life that is constant. Growth and development is a part of being alive. But growth is often misjudged as the innate need to move upwards. But growth, like anything human, is subjective. It is understandable

that the next logical step for a person to want to move up the chain: from to average to good to eventually, exceptional. But I have always thought of growth like plants. Aspens grow tall to reach the sun, for sure. But dandelions grow deep, understanding themselves and their needs fully so that if someone tries to uproot them they would have to try really hard. And then there's thyme and other creeping plants, which spread themselves out so much that if you

dirt to root in. You know what kind of plant you are. Understand that and grow. This is the first newsletter of the school year. It will be our monthly communication tool with parents, students, teachers and all members of the institution about the school's events. Please check the monthly school newsletter and monthly calendar found on the Kamak Schools web page at /www.kamakschool.com. The School Editorial team is very excited about this venture! We look forward to working collaboratively with parents, staff, and

chop a part of it off its roots wherever it can find

students. Cheers!
